

HEIN ELECTRIC SUPPLY COMPANY

WE ARE YOUR LIGHTING DEPARTMENT.

Lighting Project Quotations

Our lighting quotations specialists focus on public bids and projects that have a complete plan and specification set including commercial, residential, education, hospitality, and healthcare projects. For a complete fixture quote, please send fixture counts, a fixture schedule, the project due date, and the name of architect and project location. Please also include any pertinent specification pages including lamps/ballast, occupancy sensing, and lighting control.

Lighting Design Build and Lighting Controls

As your experienced lighting designer, the possibilities of enhancing your space with light are endless. We have access to all major lighting lines in addition to hundreds of decorative options for commercial and residential. We pride ourselves on our knowledge of the ever-changing market of LED lighting and the compatibility of LED with the major lighting control systems. For a complete lighting layout please provide a scaled PDF and a .DWG CAD file.

Commercial and Multi Family Project Management

Once your order is in-house, the project will be assigned to one of our experienced lighting project managers. They will work with you to establish a job schedule, expedite your order, set up project staging, delivery, and handle any issues or requests that you may have.
